

Centralizes Hospital Data Management

By TahuTech

PROBLEMS

Hospital patient data is only for each hospital

CHALLENGE

Hospital patient data becomes centralized

Target

3.c

Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing States

Why we choose this target?

Are we inspired by?

Patient Data

Add Patient

Search

Name	History	Check-Up Date	Disease
Jojo	Check	2022/10/1	Aids
Choko	Check	2022/10/1	Cancer
Moli	Check	2022/10/1	ACL
Steve	Check	2022/10/1	Lung
Lukman	Check	2022/10/1	Cough
Anto	Check	2022/10/1	Eye

The website is the platform that we use

Members

Add Member

Search

Id	<input type="checkbox"/>	Image	Name	Rating
1	<input type="checkbox"/>		Adrian	
2	<input type="checkbox"/>		Dede	
3	<input type="checkbox"/>		Wawan	

**The product we use
to apply it**

WHY??

Impact

Faster search for data

Data becomes centralized

Easier for society

What is our solution?

Dashboard

Total Patients
34

Weather
24°C

Patient Data / Check

Control Data

Name	History
Jojo	None
Choko	Heart Cancer
Moli	Knee Injury
Steve	none
Lukman	none
Anto	Head Injury

Tools for understanding the impact of solutions

We use Google Forms to help understand the impact of our solutions by providing surveys to hospital administration and visitors

Data from surveys

data shows that 53.8% answered that it was not effective, therefore we want to find a solution to make hospital administration effective

we see as the future for our project

Back to our initial goal in creating this website, we want our project to be used by all hospitals in Indonesia to make it easier for admins and visitors.

Expand the solution

We always propose collaboration with government health agencies to expand the use of the website we have created
